for the leading industry of a great country The cereal crop, which is of greatest gen eral interest, shows an increase in pro duction, acreage and cash value over an preceding year. 1881 was a bad year; acreage increased from 120,926,000 to 123,388, 000, and there was a slight increase-about \$100,000-in value as compared with the previous year, but the production fell off 650,000,000 bushels. Comparing 1882 with 1880 there is an increase in production of 440,000,000 bushels, of 81,000,000 in the acreage, and of \$200,000,000 in the value. As compared with the annual average for ten years we were ahead in 1882 nearly 90 000,000 bushels, 38,000,000 in acres, and \$500,000,000 in money. For the greater part of this vast yield the farmer found his market at home, secured to him by the employment at living wages of that large

The figures represent bushels, except for tobacco, which is given in pounds, and tory hay, given in tons. Statistics are not a hand to show the value of live stock, coal oil and manufactures produced within the year. These would be useful for comparison and as giving some idea of our whole industrial activity for a year.

and beard. Drunkenness is frequent at many places on Hawaii; both imported and home distilled lignor are used. Okolehao is a favorite beverage at Kan. It is thought that the most of it comes a place called Kamaoa, near Kahuku. It is a place which affords a flae opportunity for illicit distilling, there being many caves and hiding places on the old lava flows, and the ti, from which the liquor is distilled, abundant. Some of the most prominent natives of Kan are interested in the business.

ASCHOOL OF BURGLARY. The Queer Educational Enterprise of Released Criminal in St Louis.

St. Louis Post Dispatch, A Post Dispatch reporter, who droppe into a ball given at Druid's Hall one night last week, met a young man who had a "pointer" for him. The "pointer" related to the school of burglary run by Truman Ryan, ex burglar, at his home on Twenty second street. The newspaper man's in formant said he knew three of the pupils

accomplished rapidly it is called pneumonia or quick consumption; when slowly, consumption, but in any event it is the result of impure blood, caused by diseased kidneys and liver.

These are facts of science, and vouched for by all the leading physicians of the day. They show the destrability—nay, the necessity, of keeping these most important organs in perfect condition, not only to insure health, but also to escape death. It has been fully shown, to the satisfaction of nearly every unprejudiced mind, that Warner's Safe Kidney and Liver Cure is the only known remedy that can cure and keep in health the great blood purifying organs of the body. It acts directly upon these members, healing all ulcers which may have formed in them and placing them in a condition to purify and not poison the second street. The newspaper man's informant said he knew three of the pupils and would obtain for him an introduction to Ryan and a place in one of his classes, if this were desired. The offer was very preliminaries, the reporter yesterday after the necessary preliminaries the reporter yesterday after the necessary preliminaries the necessary preliminaries the have formed in them and placing them in a condition to purify and not poison the blood. This is no idle statement or false theory. Mr. W. C. Beach, foreman of the Buffalo, N. Y., Rubber Type Foundry, was given up to die by both physicans and friends. For four years he had a terrible cough, accompanied by night sweats, chills, and all the well known symptoms. He spent a season south and found no relief. He says: "I finally concluded to try Warner's Safe Cure and in three months I gained twenty pounds, recovered my lost energy and my health was fully restored." The list could be prolonged indefinitely but enough has been said to prove to every sufferer from pulmonic troubles, that there is no reason to be discouraged in the there is no reason to be discouraged in the least, and that health can be restored.

and the other for drawers—a case affect with a serrated or saw edge, and a small "jimmy."

The preliminaries having been arranged, Ryan gate the reporter his first lesson, instructing a young man named Jim at the same time. Explanations of various rackets finished the first lesson, which was designed more than anything else to introduce the young burglar to his tools. Before the reporter left Jim got a lesson in safe-blowing, the three-foot "jimmy," the brace and bit and the small saw for cutting away hinges being brought into action on a block of wood, with a combination knob upon it. Ryan showed Jim, who, it appears, had assisted at a late attempt at safe-blowing on Broadway, how to bore the three-eighth inch hole near the combination, so as to blow the lock to pieces; how to gauge his charge of powder, handle the fuse and adjust the wet blankets, etc., carefully explaining each point and dwelling up:n the value of every suggestion he made. The leaden hammer and cold chisel have, it seems, almost passed out of use, the saw taken their place and being recognized as a speedler and more satisfactory implement.

Out Popped John Daniel's Eye.

There was an occurrence in Northern berties vesterday which beyond doub has no parallel in any known history. While John Daniel, or Hughes, a negro, While John Daniel, or Hughes, a negro, better known as: "Pop-Eyed John," was a walking along the street his right eye popped out and fell down on his cheek. It hung there for several minutes, and John was rightened out of England.

MAYOR'S OFFICE, CITY BUILDING, WHEELING, W. VA., May 26, 1883.

the lungs. Any diseased part of the body has contaminating power, and yet the blood, which is the life of the system, is brought into direct contact with these poisoned organs, thus carrying contagion to all parts of the body. Bishop Jesse T. Peck, D. D., LL. II., whose death has been so recently regretted, is reported to have died of pneumonia, which medical authorities affirm indicates a diseased condition of the kidneys. It is well-known, moreover, that for several years he has been the victim of severe kidney trouble, and the pneumonia which finally terminated his life was only the last result of the previous blood poisoning. The deadly matter which is left in the lungs by the impure blood clogs up and finally chokes the patient. When this is accomplished rapidly it is called pneumonia or quick consumption; when slowly,
